[GSS UNIT FEATURES].

[GSS Unit Characteristics] Perpetuity

1. GSS units are valid indefinitely.
2. An emission referenced by GSS units may be surrendered any time after its creation.

[GSS Unit Characteristics] Indivisibility

1. The GSS unit is expressed in CO₂e equivalent.
2. 1 ton is the smallest possible unit.

[GSS Unit Characteristics] Reliability

1. Each GSS unit is audited by an independent Verifier (Auditor) according to applicable standards.
2. All information about a GSS unit, from its creation to its surrender, is stored on the blockchain.

[GSS Unit Characteristics] Origin

1. GSS units come only from Projects that meet the requirements of the GSS CERT System.
2. Each GSS unit is associated with a Protocol approved under the CERT GSS System.
3. A GSS Unit Owner may obtain information about:
 - a. Protocol, e.g. Biogas
 - b. Country of origin
 - c. Year of origin of the represented emission
4. The administrator can provide more information about the GSS Unit.

[GSS Unit Features] Types / Types

GSS units are divided as follows:

1. GSS unit representing sequestered emissions
2. GSS unit representing avoided / reduced emissions
3. GSS unit representing absorbed emissions

[GSS unit characteristics] Sustainability criteria

1. Each GSS Unit meets at least 3 sustainability criteria.
 2. The criteria met by a GSS Unit are assigned to it.
-

[WARRANTIES]

[Guarantees] GSS units

1. Each GSS Unit is verified.
2. The Administrator takes responsibility for each GSS Unit, which means that in case of doubts related to a particular GSS Unit, the Administrator exchanges the GSS Units for the correct ones.

[Responsibility] Warranty Replacement Procedure for GSS Units

1. The Warranty Replacement Procedure consists in the surrender by the Administrator of another GSS Unit owned by him, with parameters analogous to the GSS Unit subject to Replacement Procedure; surrender takes place for the Administrator.
2. The Warranty Replacement Procedure does not involve any action on the replaced GSS Unit.
3. The replacement operation is confirmed by an independent, external Verifier.
